fedora ƒ ™

## Fedora

Fedora comes on a installable DVD or in a 5 CD set.
Packages are selected to cater to a broad spectrum
of use, from home and business use, to system administration
and software development. No matter who you are, Fedora
can provide you with the best free software to meet your needs.

The Desktop

The default Fedora desktop uses the GNOME desktop environment. It is easy to use, simple and suitable for everybody. You are free to change the themes, or even to replace it with a different desktop environment altogether.

For the eye-candy lovers, Fedora includes Compiz Fusion, a 3D desktop, in its default installation.

If GNOME is not your desktop of choice, KDE and XFCE are readily available.

OpenOffice

OpenOffice.org is a multi-platform and multilingual open source office suite. It has everything you need for productivity in your business, studies and everyday tasks.

- OpenOffice Writer
  (Word processor)

- OpenOffice Calc
  (Spreadsheet application)

- OpenOffice Impress
  (Slide show designer)

Freedom | Friends | Features | First

Network Manager

NetworkManager provides improved wireless network management and sharing support. It includes support for multiple devices and provides the capability of system-wide configuration, among many other enhancements to make your networking experience easier.

Pulse Audio

Pulse Audio is installed and enabled by default. Pulse Audio is an advanced sound server compatible with nearly all existing Linux sound systems. Pulse Audio allows for hot-switching audio outputs, individual volume controls for each audio stream, networked audio, and more.

Plymouth

With Plymouth, the new graphical boot sequence, the startup experience became flicker-free, seamless, shiny and faster!

Getting Fedora

Fedora can be acquired easily through public mirrors, BitTorrent or using Jigdo.

About the Fedora Project

The Fedora Project is sponsored by Red Hat and is a collaborative effort between Red Hat and the open source community. Built exclusively from the latest open source technology, the Fedora operating system is community supported and freely available. The Fedora Project is not a supported product of Red Hat, Inc. For more information, please visit http://www.fedoraproject.org

About Red Hat, Inc.

Red Hat is the worlds premier open source and Linux provider. Red Hat is headquartered in Raleigh, N.C. and has offices worldwide. Please visit Red Hat on the Web at www.redhat.com.
